ON STAGE

“THE TOTAL ELECTRIC HOME”

Clean, quiet and efficient as electric light . . . that's electric heat.

You don't have to store it or wait for it to be delivered. And since there's no soot, you'll find yourself painting much less often. That's just one of the ways electric heat saves you time and money.

For the first time you can dial the right temperature for each room, because you may have a thermostat for each room. It can be 65° in the kitchen and 72° in the baby's room at the same time.

Call your LILCO representative and join the many Long Island families who are living better electrically.

“Jack In A Box” is a new departure for the NFCT. We have never done a Revue in the past, and we found this quite a challenge. We had the help and guidance of Jack, but he made us sweat out our own jobs only stepping in when we really floundered. The very least we can say was that it was a joint effort. It was work and it was fun. It was Jack’s brain child, but we were given the task of rearing it, of nurturing it and giving it the final push out on its own. It may have been Jack’s brain child but we claim it too. Jack brought in over half of the membership with this production. That in itself makes this show something more than special to us, and we hope to you.
