## ON STAGE

### “THE TOTAL ELECTRIC HOME”

Clean, quiet and efficient as electric light . . . that's electric heat.

You don't have to store it or wait for it to be delivered. And since there's no soot, you'll find yourself painting much less often. That's just one of the ways electric heat saves you time and money.

For the first time you can dial the right temperature for each room, because you may have a thermostat for each room. It can be 65° in the kitchen and 72° in the baby's room at the same time.

Call your LILCO representative and join the many Long Island families who are living better electrically.

EDITOR'S MESSAGE

This will be a personal note not the usual group type message. We are always worrying about over exposure on stage. The ham in us usually pushes us to try out "just one more time". Since this will be my last chance to be on the NFCT stage for at least a year, the ham won out. I shall miss it. I shall miss the rehearsals, the curtains, the work, the fun, but most of all I shall miss those people whom I consider to be some of the best in the world. I shall miss those people who are the NFCT.

Thank you,

ART WILKS

## FROM THE DIRECTORS

We hate to say all the usual things but "never have so many done so much . . ." to reward the efforts of two neophyte directors. Our thanks to our producer, the entire production staff, and to every member of the cast. Each individual gave so much of himself that the final group effort quite overwhelmed us.

Our wish for you, our audience, is that you have as much fun tonight as we have had during the last two months.
